

Distech Controls VT6002 Applications and Controllers

The Live VT6002 Applications and Controllers Course will be presented by a trainer Live and from the comfort from your own home/space. This training will allow the trainer to present our products, solutions, controllers, software tools and applications via an interactive online environment. Expect to dedicate a full week towards learning and interacting live with our solutions.

Example day:

8am	10:30am	Trainer	is interactive with presentations and performing demos, Q&A
10:30am	12pm	Student	is performing a lab(s) with support from your trainer if needed
12pm	1pm	-	Lunch
1pm	3:30pm	Trainer	is interactive with presentations and doing demos, Q&A
3:30pm	5pm	Student	is performing a lab(s) with support from your trainer if needed

The VT6002 is a 5-day interactive training. Each day will consist of approximately a 2.5 hours x 2 (AM/PM) session with your trainer followed by a lab with the support of your trainer and technical support present in the session. Students are expected to be working with hands-on labs after each AM/PM session. All students will have access to products remotely!

Pre-requisites:

- Niagara4 Certificate
- Laptop with EC-Net 4, EC-gfxProgram, xPressNetwork Utility, Support Pack and Productivity Enhancing Tools installed
- Administrative privileges on laptop and understanding of laptop configuration tools and peripherals
- You are confirmed into this course

Your space/office:

- Prepare your surroundings for virtual trainings: quiet area, coffee machine, paper, pen, etc.
- Minimal interruptions during presentation
- Reliable internet with recommended upload/download speeds
- Access to peripherals (Camera/Mic) for video conferencing
- The understanding of these connections and peripherals

Course Outline:

Day/Time	Lab	Equipment Needed
Monday AM	- Intro to Distech Controls Solutions - EC-gfxProgram overview	EC-gfxProgram Emulator
Monday PM	- Getting started with EC-Net4: Fan Coil Unit - BACnet Basics - Pre-loaded Programs	EC-BOS ECB-350 ECB-VAV
Tuesday AM	- Starting an AHU code - AHU Lab	EC-gfxProgram Emulator
Tuesday PM	- Network Values - SAT SP - Heat/Cool - Fan Controls - Alarms	EC-gfxProgram Emulator
Wednesday AM	- Experience ECLYPSE - XpressNetwork Tools - Configuring a BACnet IP controller	ECY-S1000E
Wednesday PM	- Discovering remote devices - For Loop - Unitouch and MyPersonify	ECY-S1000E + ECB-VAV
Thursday AM	- How to load an XpressENVYSION project - BACnet IP integration to EC-Net4 - Time Sync - Schedule Export	ECY-S1000E
Thursday PM	- XpressENVYSION Graphics - Remote Device Discovery - Data Tree	ECY-S1000E
Friday AM	- Single Sign On (SSO) - Remote Templating - Review	Demo
Friday PM	- Exam/Certification	

Totals

Topic/Lab	Delivery Type	Method	Est Time (Hrs)
Instructor Presentation/Demo	Instructor-led	Virtual	16
Lab Work	Offline	Independent	18
Certification Testing	Offline	Independent	4
Total			38
