Acuity Brands has announced that Distech Controls has launched the ECLYPSE Sky Ecosystem platform which allows occupants to easily manage comfort settings within their space using a mobile device.

Charles Pelletier, director of product management at Distech Controls, said everyone has their own preferences for temperature and light levels.

“Our new platform allows occupants in building spaces to have greater personal control over these elements in their indoor environment through the my PERSONIFY app on their mobile device,” he said.

The ECLYPSE Sky Ecosystem platform includes the Allure UNITOUCH touchscreen, my PERSONIFY app, and EC-Multi-Sensor sensing and communicating device. The cutting-edge user interface of the Allure UNITOUCH is fitted with its own touch sensor.

With its built-in Bluetooth Low Energy (BLE) technology, it can be paired with a smartphone for quick and easy adjustment of room comfort settings such as HVAC, lighting and sunblinds.

The EC-Multi-Sensor BLE features a motion detector, light sensor, temperature sensor, and a BLE transceiver that together will enable the wireless control of comfort settings in building spaces. The my PERSONIFY app is easily customizable for each user through its intuitive interface.

Occupant well-being is an increasingly important consideration for optimizing workplace performance, reducing absenteeism and boosting morale.

Distech Controls president, Martin Villeneuve, said occupants using the platform can easily and quickly modify environmental conditions according to their own requirements in spaces such as hotel rooms, cellular offices or classrooms.

"We were able to create an occupant-focused and mobile-accessible platform, putting employees or guests in charge of their own spaces to maximize comfort, control and well-being, the interface of which can blend aesthetically in the environment as it is available in black and white finishes," he said.

Commercial Sales Engineer, VIC

Looking to recruit an experienced Sales Engineer to drive and grow our commercial sales business in VIC. This role will support, develop & establish new business opportunities through various networks to meet sales targets. The position is based in VIC working within the state-based sales team and reports to the Commercial Sales Manager. This is a pivotal role and great opportunity for an experienced, well connected Sales Engineer to make a significant impact in the VIC market. The job will involve regular travel in and around VIC and surrounding regions.

This is a great opportunity to join a world leader in climate control solutions and apply your technical and business development skills to drive results.
