Distech Controls North American Digital Partners

Digital Partner	Category	Description
Occupant Services		
Digital Partner	Category	Description
Atrius	Indoor Positioning	Atrius software products enable organizations to optimize energy consumption, manage physical assets,and deliver personal, meaningful experiences within their commercial spaces
Cardiweb	Digital Assistant	Digital workshop specialized in digital transformation and the development of Web & mobile applications
Jooxter	Space Management	Jooxter is a leading Workplace Management & Occupancy Data Analytics platform that improves workplace efficiency and employee wellbeing.
Nexudus	Space Management	Nexudus is the leading white-label workplace software to manage and scale up coworking and flex workplaces as well as to help companies adopt hybrid work models.
Nventive	Digital Assistant	Nventive, an innovation company that support and guide their clients in their digital transformation with tangible solutions. Strategy, creativity, design and technology are forged into a complete solution tailored to the client's vision.
Witco	Digital Assistant	Get the complete solution to easily manage and optimise the occupancy of your workplaces. Meeting room and desk booking, hybrid work management, data & analytics, incident reporting, visitor management - all in one place.
Visioglobe	Digital Floorplan	Visioglobe offers a proprietary digital mapping and wayfinding technology on mobile and web platforms for navigation and resource visualization.
Building Technologies		
Digital Partner	Category	Description
Bitpool	Data Management	Bitpool removes the complexity of integrating and owning on-premise systems. Bitpool enables low-cost, simplified access to data allowing users to create value, day one, from a feature visualization ,data storage and open API platform
BuildingsIOT	Operation Optimization	Buildings IoT provides solutions for FMs and SIs. OnPoint is an intelligent cloud-based building management system that optimizes the day-to-day operations of building managers with an array of advanced tools accessible from a single location. IoT Jetstream is an AI-based data tagging and relationship modeling engine that unlocks building data to help SIs design smarter buildings.
Cpower	Energy Management	CPower provides grid operators and utilities with flexibility, by facilitating and optimizing participation in US demand-side management programs.
Dormakaba	Access Control	Dormakaba creates seamless access solutions that make buildings smarter and more secure.
Draper	Comfort Management	As a manufacturer of Solar Control Shading Systems, Draper merges technology and functionality to design and create products that exceed expectations.
Encycle	Energy Management	Encycle helps multi-site commercial and industrial companies improve efficiency of their HVAC systems through their data-driven, multi-patented Swarm Logic® technology.
Enersponse	Energy Management	Enersponse allows you to use existing building controls to save money on electricity bills and generate demand response revenue by participating in customized energy reduction programs - at no harm or cost to your business.
Firedome	Cyber Security	Firedome secures IoT devices with Endpoint Protection to both detect and prevent cyber attacks.
Genetec	Access Control	Genetec provides unified security solutions, combining IP-based video surveillance, access control, automatic license plate recognition, communications, and analytics to protect the everyday.
HID	Access Control	Powering Trusted Identities of the world's people, places, and things.
Kode Labs	Data Management	KODE Labs offers a smart building operating system that integrates all existing and future building systems into a single pane of glass.
Meersens	Comfort	Deeptech company leader in environmental data. Geo-temporal modeled platform (air, water, noise, pollens, etc.) and engagement contributing to the health / well-being of populations.
Moby	Access Control	Moby is a managed platform that optimizes your vendor's performance through continuous accountability and transparency to protect your employees, customers, brand, and bottom line
Nozomi Networks	Cyber Security	Gain visibility into building management systems (BMS) / building automation systems (BAS), while protecting human safety, operational performance and mitigating security risks.
Openpath	Access Control	Openpath has created a next generation "Touchless" access control that makes every building more safe and secure. Fast. Flexible. Future-proof.
Optigo Networks	Security	Visual BACnet by Optigo Networks is the industry's leading software solution for troubleshooting and monitoring building automation networks
Phoenix Energy	Energy Management	Phoenix Energy Technologies delivers Smart Building IoT data analytics solutions and intelligent insights to enable smarter, more efficient buildings.
Polestar	Indoor Positioning	Pole Star is a global leader and pioneer in indoor positioning services created in 2002. Based in the US and in Europe, Pole Star has almost 20 years of proven industry experience in indoor location and a robust portfolio of customers.
Sviteco	Data Management	Sviteco provides cost effective outsourcing services for UI/UX Design and execution of BMS Graphics using ECLYPSE Designer/Envysion/DGLux as well as native PX graphics in EC-Net.
TCS Clever Energy	Energy Management	Offers cloud/edge-based solutions for advanced energy - carbon management/mitigation and sustainability of water/air/gas/electricity/steam for continuous value-add and real-time deep-data modeling.
ThoughtWire	Data Management	ThoughtWireOS orchestrates data from people, process, and the physical built environment to deliver smarter, safer, and more efficient hospitals, commercial buildings, and cities.
Umny Inc.	Data Management	Umny Inc. builds flexible and accurate AI software for smart control, optimization, fault detection & diagnosis (FDD), and forecasting.
Verdify Security	Cyber Security	Veridify's DOME™ provides cybersecurity for new and existing building automation systems, protecting data and communications - stopping cyberattacks before they happen.
Visioglobe	Digital Floorplan	Visioglobe provide a proprietary digital mapping and wayfinding technology on mobile and web platforms for navigation and assets visualisation.
Zuul	Cyber Security	Zuul IoT provides explicit, high-value cybersecurity solutions protecting the universe of IIoT devices, controllers and networks that underpin today's smart buildings.
Property Management Services		
Digital Partner	Category	Description
Checkhub	Building Management	Chekhub provides a Work Enablement platform. Empower your workforce, perform tasks confidently, and have visibility of your entire workflow.
Facilio	Building Management	Facilio's platform reduces operating expenses and improves retention for building owners by lowering energy costs, optimizing maintenance and boosting productivity
Innes	Building Management	Digital audiovisual communication and traditional signage codes
Maxen	Building Management	Maxen was founded to address one of the world's largest GHG emitters, buildings. We enable managers to increase their operational and energy efficiency.
Onion Technologies	Building Management	ONION Technology provides a unified monitoring & control software for Data Centers including EPMS (Electrical Power Monitoring System) and DCIM (Data Center Infrastructure Management).
