

HOTEL STARY

Hotel

5 300 sqm
Krakow
Poland

Integration with the hotel's old BMS

Integration of the room control (HVAC, lighting and sunblind control) to make them easy to use for occupant and ensure automatic remote management.

A modular and adjustable solution

Our programmable controller series combined with lighting and sunblind expansion modules has enabled us to answer the project's specifications. Distech Controls offers a unique and modular solution, based on open standards, for a combined control of HVAC, lighting and sunblinds in each office room. A unique solution that optimises energy efficiency and comfort in buildings, all the while reducing operating costs.

The EC-Net^{AX} Supervisor provides seamless integration with old, existing part of installation and remote web access.

Distech Controls' open solution

Distech Controls' solution provides a complete control of the HVAC terminal units, radiators, lighting and sunblind. Furthermore our open solution has enabled to integrated the new BMS with the one already installed in hotel.

The natural ability of our EC-BOS to exchange data between devices and systems using different communication protocols, has enabled to create an optimal management system of all building installations and subsystems responsible for comfort and minimal energy consumption.

The Hotel required maximum reliability and minimum service time. The EC-Net^{AX} supervisor answered perfectly the project's requirement providing the possibility of remote internet access to the system allowing any necessary service actions (including controller programming and upgrading, system and network management) reducing service time and costs.

REFURBISHMENT

Refurbishment of the existing site with new rooms.

Winner of the title of «Most beautiful hotel interior in Europe» in the renowned Parisian Villégiature Prix competition.

Authorised System Integrator: Distech Controls Poland

List of Distech Controls' product installed:

- 11 RCL-PFC-107
- 11 ECL-PTU-307
- 22 ECx-Light-4
- 2 EC-Smart-Vue
- 25 Smart Sense
- 3 RCx-Blind
- 1 ECL-600
- 3 ECL-400
- 1 EC-BOS-640E
- EC-Net^{AX} Supervisor
