Hotels

Connected Building Solutions

Open building automation systems to minimize risk and improve efficiency
Does Your Hotel Feel Like Home?

At Distech Controls™, we understand the value of an exceptional guest experience to your business. Today the standards are shifting, life is becoming more seamless and more connected. Hotels who are engaging their guests via mobile apps are becoming the new normal. Our proven IP-based solution with RESTful API puts you in the driver’s seat to create a guest-centric hotel that makes guests feel at home and keeps them coming back for more.

It’s Not Just About Entrusting, It’s About **Empowering**

**Guests**
Empower your guests to feel at home by enabling them to easily unlock their door, check in, change temperature, fan speed, light levels, blinds and more, all from their phone.

**Hotel Staff**
Help hotel staff gain access to more data points about floors, rooms, services and guests to ensure they deliver the best service possible.

**Owners & Operators**
Create a guest-centric hotel experience via an open system that can integrate with systems, hotel services and mobile apps.
Open Systems: The Safest Investment for the Best Guest Experience

Building systems have traditionally been proprietary and not flexible like open systems. Proprietary systems speak different languages, resulting in incomplete visibility, data, and reliability, and leave you tied to one, often expensive, service provider.

In contrast, Distech Controls’ commitment to open protocols and industry IT standards, combined with our best-of-breed technology offering, create a sustainable foundation that supports and evolves with your building system’s life cycle, and lets you choose from competitive prices in service providers.
Guests are more likely to share their positive hotel experience on social media when the hotel has integrated mobile technology.
Connected Building Solutions

How Connected Building Solutions Help with Guest Satisfaction

Multi-System Integration for Guest Satisfaction
Link our building automation system with 3rd party software via our open RESTful API to create your own apps that engage guests. By integrating with building services and your rewards program, guests can use their smartphone for things like opening their room door, adjusting their room settings, checking wait times at the restaurant, and finding their way to the gym.

State-of-the-Art User Experience
Our range of wall mounting sensor/user interfaces give you a great choice of ways for guests to interact with the room functions. Our Allure UNITOUCH uses the latest multi-touch color display technology to provide an integrated way for guests to manage their air-conditioning, lighting and blinds, as well as offering in-room messaging and the potential for additional services. All the functionality can be mirrored on our free my PERSONIFY mobile app for iOS or Android, with the linking of a guest’s phone being incredibly simple via Bluetooth.

How Connected Building Solutions Help with Operations

Reporting, Analytics & Dashboards
Easy to generate and use, our reporting software can show trends, space utilization, alarms, maintenance issues, energy usage and more. Customized dashboards analyze data and give each stakeholder the views they need.

Energy Savings
Once your Hotel Management system has unified all the various monitoring and control functions required in the building, you can apply sophisticated algorithms to achieve energy and costs savings, as well as improve guest comfort and speed of response to any maintenance issues that arise.
Did you know? Incorporating mobile apps and functionality into a hotel stay is associated with higher guest satisfaction
Products

**ECLYPSE Controller Series**
Connected IP and wi-fi product series

**ENVYSION**
Responsive, web-based graphic design and visualization interface

**Allure UNITOUCH and my PERSONIFY**
State-of-the-art touchscreen user interface and mobile application

**EC-Net**
Web-based multi-protocol building automation and energy management platform
Connecting people with intelligent building solutions for better health, better spaces, better efficiencies.

Distech Controls has set the standard in the industry for innovative, cost-effective, and truly open building and energy management systems that help increase operational savings and sustainability throughout the life cycle of your facilities.
