

HVACR OEM Solutions

Deliver scalable, connected, and future-ready solutions with confidence

Build Your Competitive Edge Across Every Project

Speed to Market

Select from a wide variety of products that fit diverse requirements and needs.

Reliability and Security

Meet strict standards in demanding environments with rigorously tested solutions.

Scalable Controls

Benefit from controllers that deliver local performance with software that scales globally.

Partner Empowerment

Enable your product success with our technology and expert services throughout the equipment lifecycle.

Open Connectivity

Integrate seamlessly across legacy, current, and IoT applications with our multi-protocol ecosystem.

New Revenue Opportunities

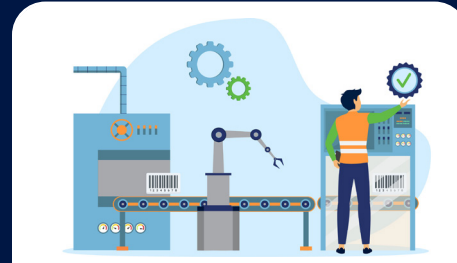

Unlock recurring service value with remote connectivity to monitor and update units across sites.

Partner With Us at Every Step of Your Equipment Lifecycle

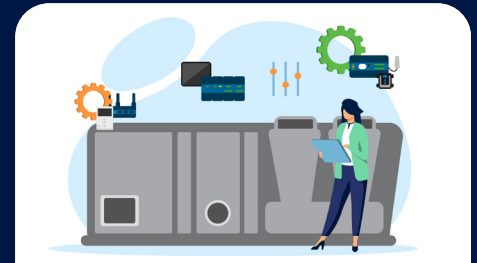

Design

Utilize our expertise and engineering tools to streamline processes and lower design costs.

Manufacture

Accelerate production with automation tools and end-of-line testing support.

Commission

Create tailored, ready-to-install controls and equipment bundled solutions.

Operate

Boost after-production value with cloud monitoring and preventative maintenance.

Service

Enhance field service efficiency with advanced analytics and warranty support.

Experience That Delivers Results

- Proven global performance across NA, EMEA, and APAC.
- Operational excellence through consistent delivery and uncompromising quality.
- Trusted by OEM leaders for hyperscale data centers and advanced HVACR systems.
