

Distech Controls Expands ISO 14001:2015 Certification to its Global Head Office, Strengthening its Ongoing Commitment to Environmental Management

[Brossard, Québec, Canada, December 10, 2025] – Distech Controls Inc., an innovative leader in intelligent buildings, is proud to announce that its global head office and production site in Brossard, Quebec has received ISO 14001:2015 certification, a globally recognized standard for Environmental Management Systems (EMS). This significant accomplishment underscores Distech Controls’ ongoing focus on sustainability and innovation, further advancing its mission to make buildings smarter, safer, and greener.

The ISO 14001:2015 certification builds on the accomplishments of the company’s European headquarters in Brignais, France, which has held ISO 14001 certification since 2022. This achievement reflects Distech Controls’ ongoing efforts to implement best practices and advance sustainability throughout its worldwide operations.

“We are honored to have achieved ISO 14001:2015 certification at our Brossard site,” said Elisabeth Gagnon, Vice-President, Operations at Distech Controls. “This milestone reflects the concrete steps we’ve taken to reduce our environmental impact and adds to the long-standing ISO 9001:2015 certification, a globally recognized standard for Quality Management, the Brossard site holds. From integrating environmentally responsible practices into our facilities and operations to engaging employees in continuous improvement initiatives, it builds on the momentum of our EarthLIGHT program.”

The Process

Led by a cross-functional team, the certification process involved over 200 associates who were trained and mobilized. Internal audits were conducted in partnership with Distech Controls sustainability teams, and external audits were led by the National Sanitation Foundation (NSF), an independent third-party expert in public health, safety, and quality standards.

“We observed a team demonstrating strong cohesion and a genuine commitment to environmental performance, supported by a proactive and sustainable culture during the Distech Controls certification audit,” said Sammy Bazizi, Lead Auditor at NSF. “I would like to congratulate the entire team for their involvement throughout the audit and encourage them to continue on this promising path.”
